Instructions:

Print out both pages and laminate. Put on a wall/notice board, ideally beside the daily visual schedule if using one.

Add 3, max 4 pieces of hard velcro to each day.

At the beginning of the week put all the LARGE activities that you know are happening that week e.g. school/ no school, any therapy appointments, extra curricular activities or social outings/visits.

I generally use this calendar in addition to a daily visual schedule and would rarely introduce it until a learner first understands the concept of the daily one.

The weekly schedule is helpful to:

- Prepare children for what is coming up in the week
- Helps teach the concept of days of the week and weekends
- Supports children in understanding school holidays or holidays to hotels/abroad
- Provides a visual countdown to something exciting that it is difficult to wait for

Monday	Tuesday	Wednesday	Thursday

Friday	Saturday	Sunday
